Sir:

INTERVIEW SUMMARY

The following is a summary of the substance of an interview held by the undersigned attorney and Examiner Walk in connection with the above-identified application. The interview was conducted on Tuesday, January 17, 2006 via telephone.

During the interview the prior art and the outstanding Final Office Action mailed on October 18, 2005 were discussed along with the wording of pending claims 5, 10, 22, 23, and 24. A discussion was also conducted relative to the disclosure of the pending application, in particular, Figs. 2 and 3.

No agreement was reached relative to allowability of the pending claims. The Examiner indicated that a further search was necessary in his opinion to clarify the outstanding issues.

Relative to claim 22 the Examiner acknowledged that detector 12 of Ellul Jr. et al. U.S. Patent 6,133,839 could not correspond to the claimed "plurality of ambient condition detectors" in view of the fact that detector 12 does not suppress any alarm from the remote alarm indicator 14 therein.

In the event that the Examiner upon review of this Summary finds omissions or misstatements, it is requested that he notify the undersigned for purposes of further supplementing this Summary.

Respectfully submitted,

Dated: January 19, 2006
